

Tip StackPack Reload System

Contamination-free handling, compact and reusable

NEW!

Contamination-free stacking system

Tips are preloaded in reusable, stacked 96-tip trays. The trays are designed to safely cover each individual 96-tip layer, shielding the preloaded tips in the stack like a protective screen.

- Certified PCR Performance Tested: Free of human DNA, DNase, RNase and PCR inhibitors
- Shielding function of stacked trays ensures contamination-free handling of preloaded tips

Considerably reduced waste volume compared to tip boxes

The lid, trays and base section of the StackPack system enable multiple use. As a result, composite materials and storage space are reduced by more than 50%. All materials are fully recyclable.

- Easy transfer of individual layers of 96-tip trays into the Tip SystemBox workstation
- Safety labels on both sides can be easily perforated to access the next layer of tips
- Tips can also be used directly from the stack

Tip StackPack in PCR Performance Tested quality

Order No.	Description	Volume	Colour code	Option	Packaging
70.760.452		200 µl			480/StackPack 1,920/case
